- Import of Bill of materials from Excel
- Configure the product operation plan via drag and drop
- Display the complete BOM structure for a better view of complex product structures
- Calculate cost of goods manufactured for the entire product structure

BOYUM CLOUD

Produce

Prioritize, release and monitor production orders and track progress in real-time

Production Manager

PRODUCE

Production order processing

- Manage production orders and receive information on material availability
- Dynamic adjustment of priorities
- Simple selection of the next production orders and release stock of work for shop floor employees
- Easy real-time access to the progress of individual operation steps
- Production order status overview
- History on collected production data

View production orders, and register work done and material usage

Shop Floor Operator

PRODUCE

Production order processing

- Get an overview of work stages for released production orders
- Receive information about required materials and resources.
- Paperless collection of production data
- Start and stop operations, and collect time and material requirements efficiently

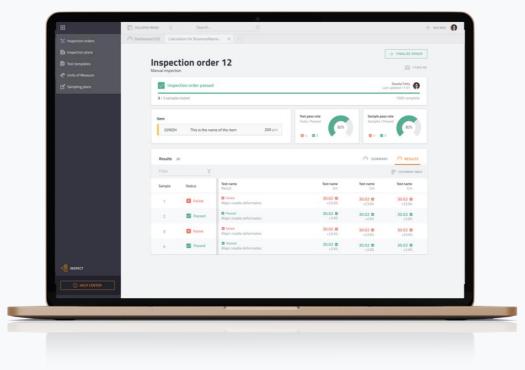

BOYUM CLOUD

Inspect

Define Inspection plans, track and release Inspection orders

Quality Manager

Quality inspection management

- Define inspection plans and quality targets
- Setup automation of inspection order creation and approval
- Progress of execution tests and samples
- Quality status real-time pass rate based on planned approval target
- Analyzing of quality data per test and sample

View and execute inspection samples and collect quality data
